

# Pollinator Friendly Redbridge

Adopt a Tree Pit or become a Pollinator Pathway and increase biodiversity and colourful streets in Redbridge

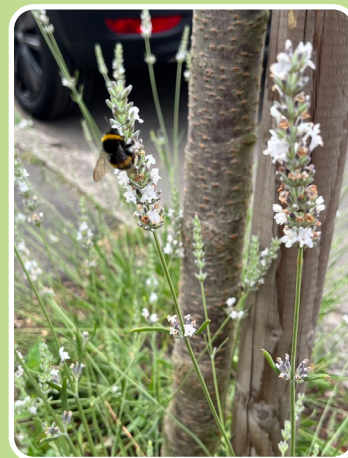

A tree pit is the soil area at the base of trees planted on the pavement, and it is perfect for planting wildflowers! You can adopt one near where you live and watch it bloom and nature thrive.

Want to go a step further? Our Pollinator Pathway scheme allows the adoption of all the trees pits and any verges on your street, giving neighbours the chance to manually weed unruly 'pavement plants' and in turn reduce the need for chemical spraying.

**Applications open Monday 23 October - Friday 31 December 2023**
